Stitch A Long Project

This project was inspired by the watercolor paintings of Hiroki Takeda. We can't use images of his paintings without permission, but an internet search will show you his beautiful work.

What do April showers bring? May flowers! We thought it would be fun to fill these sweet line drawings of a cat and a dog with flowers.

I suggest you outline the animal of your choice with whatever color matches their fur. For example, in the model I used DMC 310 because my boy Finn is a black cat.

You're encouraged to fill your fur person with beautiful flowers and finish it into a small ornament or pillow.

Feel free to size the image of your choice however you'd like it. The model is 3 x 3 inches.

Transfer the design to your fabric using your favorite technique. If you'd never done it before, YouTube has several great tutorials for transferring embroidery designs.

Next, choose several colors of floss to use and embellish your cat or dog with spring flowers and grass. You might even want to add a favorite phrase or saying!
