Botanical Stitch Along 2024 August

I made this Botanical from my stash threads, canvas, and found objects (beads, felt, ribbon, button) and finished it in a little frame. Time to try out some new stitches, use up those odds-and-ends threads, and dig into those "what do I do with this?" items! What will your plant look like? Enjoy

I made the pot in a rectangular shape with two different threads - darker blue on the rim and lighter blue on base of the pot. The stitches are Gobelin that could imitate a basket, too, horizontal for the base and vertical for the rim.

The stem and leaves is part of a ribbon I had.

piece:

Art

I used 4mm silk ribbon for the top of the plant and added beads and a Bee button on top.

This was a fun, easy and fast project.

Hope you enjoy.
